Quick and easy
installation

Explanation Lightpro system

We think it's important that you can install outdoor lighting quickly, easily, and safely. With our 12 Volt system, you can do just that!

In just a few steps you can install our outdoor lighting easily and safely.

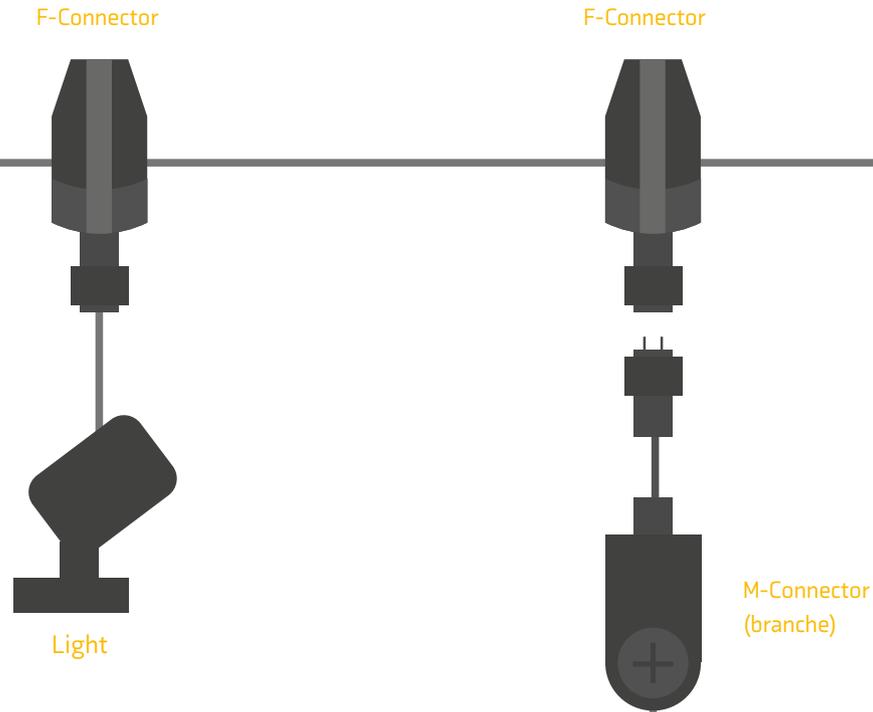

The lights and cable

1. Place the lights in the correct position and roll out the cable.
2. Position the lights and connect the F-connector to the main cable.
3. Connect the light cable to the F-connector.

The Transformer

4. Insert the end of the main cable into the Y-connector and tighten.
5. Connect the Y-connector to the transformer.
6. Plug the transformer into the wall socket.

Do you need further instructions? Take a look at the videos on our website for more detailed instructions.

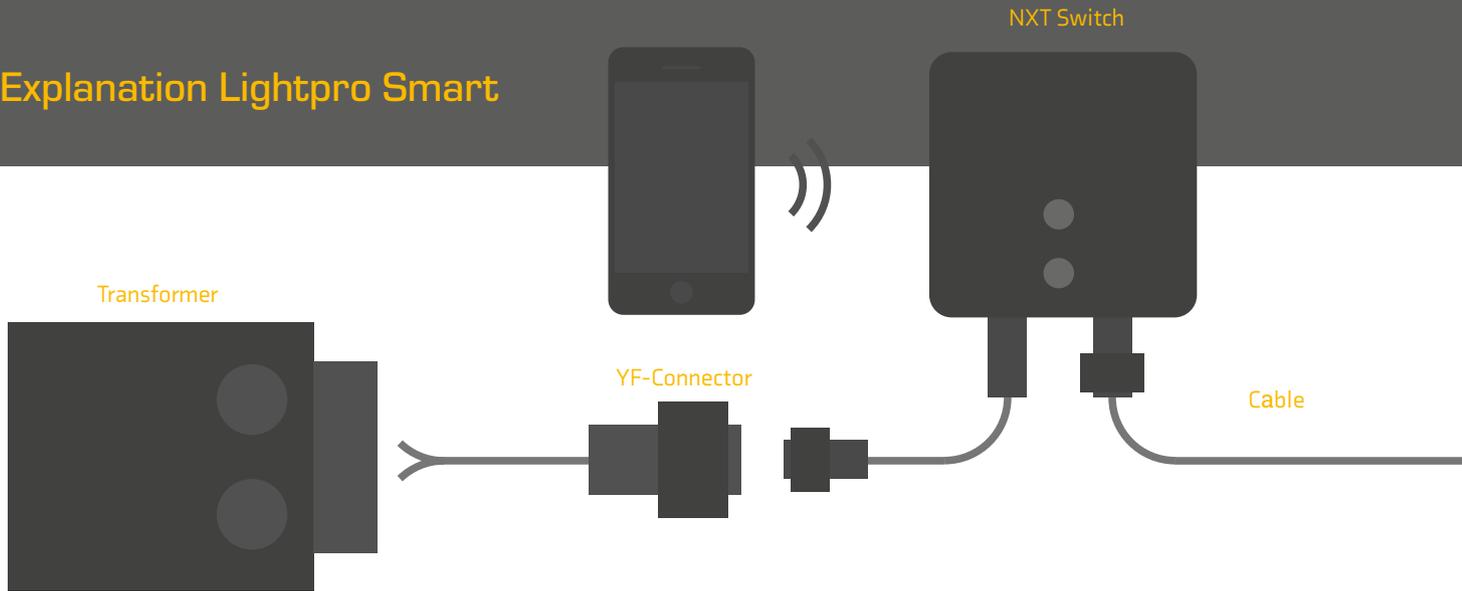

The advantages of our 12 Volt system:

- Energy-efficient and durable
- Quick and easy to connect
- No need to dig in the cables
- Very safe for children and animals

The system

Explanation Lightpro Smart

New: Lightpro NXT

Lightpro NXT is the solution for when you want to make your garden SMART using the Lightpro 12 Volt lights. It's as simple as the Lightpro system itself. All you have to do is add the Lightpro NXT Switch.

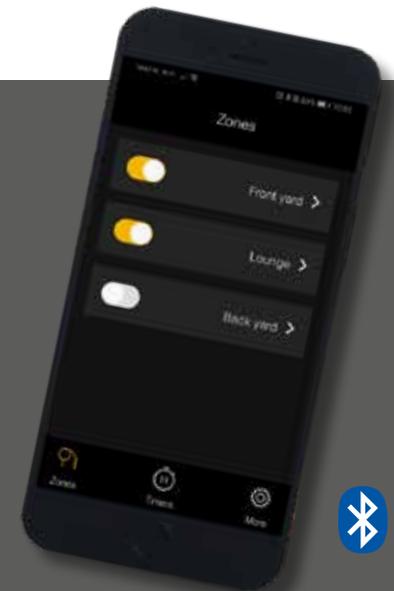

With the Lightpro app you can then easily create zones in the garden and switch them on and off independently from each other. Or create a scene and set one or more timers.

Step-by-step plan:

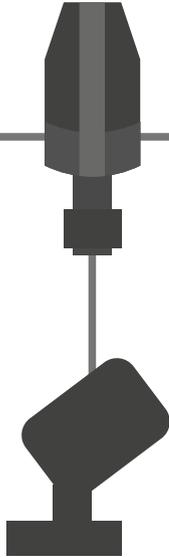

You can connect the Lightpro NXT Switch to the garden lighting in different ways.

1. If you want to work with one zone, you can place the Switch between the transformer and the main cable
2. Do you want to control one part with the app? You can place the NXT Switch on a branch
3. If you want to create different zones, you will have to place a switch at every branch

Go to www.lightpro.nl/en/smart for more information.

Post lights

Post lights in various styles

Our post lights create the right atmosphere around your home. We offer post lights in different styles that are perfect for illuminating driveways, borders, paths and terraces.

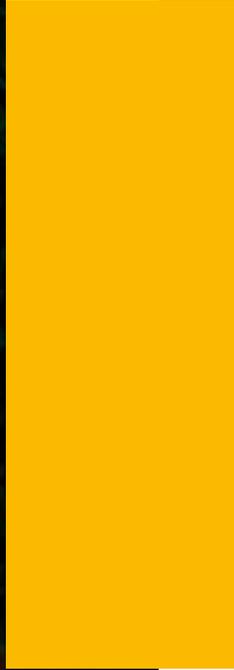

Post lights

The post light is ideal to provide lighting along the driveway, on the terrace or in the garden.

They create the right atmosphere around your house and in the evening, they play a major role in the garden. There are fixtures that give light all around, these are a beautiful option for illuminating plants, for example in a border. If you would like to light a path or driveway,

however, choose a fixture that provides direct light. Some of the lights have a dimmer button, which is indicated by the 'dimmable' logo. Having six intensities, the user determines the right light level. This is perfect for the different seasons of the year!

Post lights

Spotlights

Spotlights provide
a surprising effect
in the evening

With our spotlights, you can illuminate shrubs, smaller trees or other objects to create the right atmosphere. We offer a range of spotlights with various beams of light. Planning to illuminate a large tree? Choose our very powerful spotlight. Want to experiment with the light intensity? Go for our dimmable spotlights.

Spotlights

Spots are used to light trees, shrubs, statues, and houses.

With spotlights you can determine the perfect angle to illuminate a beautiful tree yourself. Not every spotlight can be used for the same purpose, which is why we offer different types. You will

always find the right spotlight for your garden. Take a look at our dimmable spotlights which allow you to adjust your light to accommodate for tree or shrubbery growth as your garden matures and make the best of each season!

Wall lights

Wall lights for garden and terrace

With our wall lights, you can illuminate
your fence, garden wall, or canopy in no time.

The potential options of wall lights are endless. Place several wall lights on a fence to emphasize the depth of your garden.

Planning on illuminating a pathway? Use the Kuma closer to the ground so the light becomes functional. Canopies and pergolas become even more beautiful with the right wall light. Not sure about the best light angle? Choose the Ixion. This wall fixture grants you freedom to determine the perfect angle.

Uplights

**Illuminate
your garden
with high-quality
uplights**

Would you like to illuminate a tree or uplight an object from below? Create a stunning effect with our uplights. This subtle lighting option can be perfectly concealed in the ground or under gravel during the day. In the evening they provide an impressive light effect.

Uplights

Atik R2

Agate 102U
Stainless steel 316 LED 3W
3.000K - 190lm

Our uplights are ground spotlights that you can use for various purposes. Simply place them in the gravel or sand to illuminate an object or tree.

The beauty of these spots is that they are practically invisible during the day but in the evening, they emphasize the height of the trees and the beautiful leaves. The light range and light angle play a major role in choosing the right spotlight.

Decklights

Our 12 Volt decklights
are recommended
as orientation lights

Decklights from Lightpro are modern, have a sleek appearance, and are also very easy to install. Our wide range of high quality lighting offers the best solution for every garden.

Decklights

When you want to achieve optimal results, go for multiple decklights, such as a line of lights alongside a pathway, or placed randomly for a beautiful starry path effect.
